

# PAGE “GHI FOR INSTITUTIONS” — FINAL TEXT (English Version)

## Why such a tool?

Institutions lack a neutral indicator to assess competitiveness, risks, energy impact, and the global structure of the mining sector.

GHI addresses this need by providing an auditable and reproducible measure.

---

## What GHI brings

- Full transparency of calculations
  - Open-source and verifiable methodology
  - Independence of data
  - Unique regionalized index
  - Reliable economic and energy analysis tool
- 

## Available Data

- Daily snapshots
- Complete historical dataset
- CSV/JSON exports
- Professional API
- Technical documentation

---

## Methodology Summary

- Independent data
- Regional calculation
- Weighting based on actual hashrate
- Min / avg / max scenarios
- Climate & energy adjustments

---

## Quality Assurance & Compliance

- Full auditability
- Strict versioning
